

Nithu S Kishore

Product Designer (Immediate Joiner)

Kochi, Kerala, India | +91 9496019667 | skishorenithu@gmail.com

Portfolio: <https://nithu.framer.website> | LinkedIn: <https://www.linkedin.com/in/nithu-s-kishore>

PROFESSIONAL SUMMARY

Product Designer with one year of design experience across SaaS healthcare and automotive service platforms, supported by two years of enterprise, client-facing delivery at Tata Consultancy Services. Master of Design qualified, with hands-on ownership of the end-to-end design process: user research, information architecture, user flows, low- and high-fidelity wireframing, interactive prototyping, and design system contribution in Figma. Practiced in human-centered design, usability testing, heuristic evaluation, and accessible, inclusive responsive interfaces, and confident presenting design decisions to cross-functional engineering, product, and business stakeholders in agile delivery environments.

WORK EXPERIENCE

Junior Product Designer, SaaS Healthcare Platform

Zennode Technologies | Kozhikode Cyberpark, Kerala, India | August 2025 - July 2026

- Owned the end-to-end design process for onboarding, empty-state, and consultation workflows on Dochours, a SaaS healthcare platform, taking each from discovery and user research through user flows, wireframes, and high-fidelity prototypes to reduce friction across core user journeys.
- Identified usability issues through UX audits, heuristic evaluation, user research, and stakeholder discussions, then translated findings into refined information architecture, user flows, UX writing, and UI design.
- Designed AI-powered product features in collaboration with cross-functional engineering and product teams, applying human-centered design principles to deliver user-centered product improvements.
- Contributed to and applied the product design system in Figma, reusing components and interaction patterns to keep visual and behavioral consistency across responsive web interfaces.
- Presented design concepts, rationale, and prototypes to product and engineering stakeholders, incorporating feedback through iterative agile delivery cycles and supporting design handoff to development.

Product Design Intern, Automobile Service Platform

Wrenchly Services LLP | Kochi, Kerala, India | January 2025 - May 2025

- Designed key customer journeys for an automobile service platform, simplifying the experience from booking through service tracking to vehicle delivery.
- Delivered the vehicle service booking experience end-to-end, from concept to implementation, covering service selection, appointment scheduling, and confirmation through task flow analysis, low-fidelity wireframes, and interactive prototypes.
- Ran competitive analysis and usability testing on booking concepts, using the findings to refine interaction patterns and reduce the number of steps to completion.
- Collaborated with cross-functional product and engineering teams to balance user needs against technical constraints throughout feature development, supporting design handoff and design QA.

Graphic Design Intern

Kreative Clan | Bangalore, Karnataka, India | June 2024 - August 2024

- Produced visual design and marketing creatives for international construction and industrial exhibition campaigns using Adobe Creative Suite, maintaining brand, layout, and typographic consistency across formats.
- Collaborated with content writers and marketing teams to deliver engaging digital experiences across social platforms, adapting visual systems to multiple channel and screen requirements.

RPA Developer, Automation Anywhere

Tata Consultancy Services | Kochi Infopark, Kerala, India | April 2021 - June 2023

- Developed end-to-end automation solutions using Automation Anywhere, improving operational efficiency by automating repetitive business processes.
- Handled requirement gathering, stakeholder communication, testing, and deployment of automation workflows for enterprise clients.

CORE SKILLS

Research and Discovery: User Research, User Interviews, Usability Testing, Heuristic Evaluation, UX Audits, Competitive Analysis, User Persona Development, Stakeholder Communication

Design and Delivery: End-to-End Design Process, Human-Centered Design (HCD), Design Thinking, Information Architecture, User Flows, Task Flow Analysis, User Journey Mapping, Low-Fidelity and High-Fidelity Wireframing, Interaction Design, Visual Design, UI Design, Prototyping, Responsive Design, Design Systems and Component Libraries, UX Writing, Design QA, Developer Handoff

Standards and Ways of Working: Accessibility and Inclusive Design, WCAG Awareness, Agile Delivery, Cross-Functional Collaboration, Ideation and Design Workshops, Problem Solving, Presentation and Communication

Tools: Figma, FigJam, Miro, Adobe Creative Suite (Illustrator), Notion

EDUCATION

Master of Design (M.Des)

National Institute of Fashion Technology (NIFT), Kannur, India | 2023 - 2025

Bachelor of Technology (B.Tech), Computer Science and Engineering

Muthoot Institute of Technology and Science, Ernakulam, India | 2016 - 2020

CERTIFICATIONS

- Foundations of User Experience (UX) Design - Google, 2026
- Enterprise Design Thinking Practitioner - IBM, 2026
